OPERATIONAL PERFORMANCE

During the year under review your company has achieved a turnover of Rs.61.43 crores as against Rs.43.43 crores in the previous year – a jump of 41%. The Operational Profit, before making provision for interest and depreciation, amounted to Rs. 7.45 crores as against Rs.1.73 crores in the previous year.

In spite of our plan to continue operations both at Bhiwadi and Nalagarh, several illegal and coercive acts by workers union created a situation where operations at Bhiwadi plant had to be curtailed from March 2006.

The operations at Nalagarh have stabilised at a high level of efficiency. The quality of product at Nalagarh has been very well accepted and due to number of technological improvements at Nalagarh plant, the quality is maintained at a high level.

DIVIDEND

Considering the future expansion plan and in order to conserve the resources of your company, your directors do not recommend any dividend for the period under review.

INDUSTRY EXPERIENCE

Retreaded tyres play an important, if unseen and unappreciated role in the economy. If all of us were to depend on new tyres, their prices will increase considerably. We would have to import large additional quantities of oil, as it takes three times more oil to manufacture one new truck tyre than what the retreading process involves. Retreading also reduces the problem of dumping of tyre casings which is quite serious in some countries. Therefore, the retreading process has gained considerable acceptance and the retread industry has been growing steadily in the country.

OPPORTUNITIES AND THREATS

The company has steadily grown since its operations commenced at its new plant at Nalagarh (Himachal Pradesh). Your company is continuously examining options to operate Bhiwadi plant as soon as it may become economically viable. With the termination of Joint Venture Agreement with Bandag Inc. USA, your company is exploring the export markets like Middle East, Africa etc.

We are trying to improve our market potential in Tamil Nadu, Karnataka and Kerela, which constitute 30 percent of the Indian retreading market. We are making vigorous efforts to strengthen existing customers and expanding our share of market.

RISKS AND THEIR MITIGATION

The Company is exposed to various risks which are normal in any business enterprise. The main ones and the steps undertaken to mitigate these risks are mentioned below:-

- (i) Financial risk: Credit risk on account of material supplied to customers has been mitigated to a large extent by insisting on most of the parties to pay in advance before supplies are made. In the case of others PDC's are taken against supplies. The risk of delayed payment from STU's is reduced by cutting down the supplies if payment is delayed much beyond the contracted period.
- (ii) Increase in price of raw materials: Normal increase in prices of raw materials is generally factored while fixing products prices to the customers. Unexpected increases however do affect the profitability for some time till prices are revised to pass on the cost increases to the customers. In the case of fixed price, fixed period contracts, unprecedented increase in raw material prices do affect profitability.
- (iii) Changes in governments policies: Changes in government policies can at times materially effect company's financial position or investments. There is little that can be done about it.
- (iv) Operational risk: Preventive maintenance is carried out to achieve high level of machine availability. Adequate inventory of stocks at each stage of operation is maintained to keep production going on in case of any breakdown.
- (v) Product risk: Research and development is being undertaken to deliver better products, service and value to end-customers.

HUMAN RESOURCE DEVELOPMENT

During the year, the Company had generally cordial industrial relations, except that at Bhiwadi plant where long period of unrest and illegal acts were committed by workers against legal orders of transfer of few workers to Nalagarh (HP), forcing the Management to agree to unreasonable demands and resulting in closing down of operations at Bhiwadi.

Focus on efficient shop floor management, strengthening Sales and Marketing team, continuous training to enhance the human capital has resulted in amiable association with our 177 employees. We believe in empowering our employees through greater knowledge, opportunity, responsibility and accountability.

INTERNAL CONTROL SYSTEM

The Company has adequate control systems and procedures designed to effectively control the operations at its Head Office, Plants and depots. The internal control systems are designed to ensure that the financial and other records are reliable for the preparation of financial statements and for maintaining account of assets. The Company has adequate Budgetary Control System and actual performance is constantly monitored by the management. The Company has well designed organization structure, authority levels and internal guidelines and rules.

Independent internal auditors conduct audit covering a wide range of operational matters and ensure compliance with specified standards. Planned periodic reviews are carried out resulting in identification of control deficiencies, opportunities for bridging gaps with best practices. The findings of Internal audit are reviewed by the top management and by the Audit Committee of the Board of Directors. The external auditors have evaluated the system of internal controls in the company and have reported that the same is adequate and commensurate with the size of the Company and the nature of its business.

COMMITMENT TO QUALITY

Indag recognizes quality as a pre-requisite for its operations and has implemented ISO 9001:2000 standards at Nalagarh, Plant and the Head Office.

(i) Income taxes

Tax expense comprises of current, deferred and fringe benefit tax. Current income tax and fringe benefit tax is measured at the amount expected to be paid to the income tax authorities in accordance with the Indian Income-tax Act. Deferred income tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situation where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that such deferred tax assets can be realized against future taxable profits.

At each balance sheet date the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent that it has become reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realised.

MAT credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the Minimum Alternative tax (MAT) credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in guidance note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the profit and loss account and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the

carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal Income Tax during the specified period.

(j) Expenditure on new projects

Expenditure directly relating to construction activity is capitalized. Indirect expenditure incurred during construction period is capitalized as part of the indirect construction cost to the extent to which the expenditure is indirectly related to construction or is incidental thereto. Income earned during construction period is deducted from the total of the indirect expenditure.

(k) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

(l) Provisions

A provision is recognized when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. These are reviewed at each balance sheet date and are adjusted to reflect the current best estimates.

(m) Cash and Cash Equivalents

Cash and cash equivalents in the cash flow statement comprise cash at bank and in hand, cheques in hand and short term investments with an original maturity of three months or less.
