

India firms' Q4 recovery has been strong—but lopsided

Rural incomes, easing inflation, GST reforms and festive spending aided demand recovery

India Inc.'s revenue recovery gathered pace in the March quarter (Q4FY26) as more companies broke out of sluggish single-digit growth and returned to double-digit expansion. But the rebound was concentrated in premium consumption, infrastructure and capital-market-linked businesses, prompting analysts to caution that recovery remains uneven and could come under pressure if rising inflation starts squeezing demand and margins in FY27.

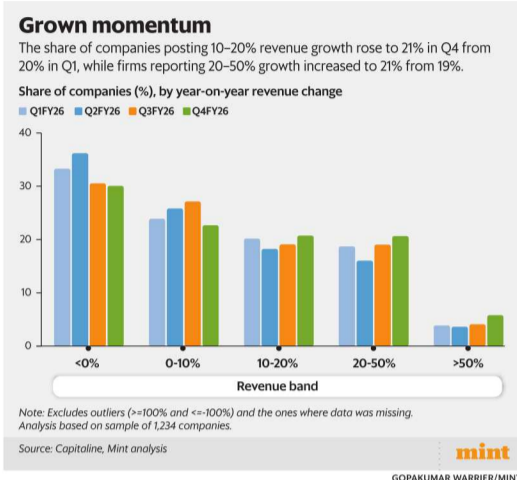

A Mint analysis of 1,234 companies that have reported earnings showed the share of firms posting 10-20% year-on-year revenue growth rose to 21% in Q4 from 20% in Q1, while those posting 20-50% growth also rose to 21% from 19%. Companies reporting more than 50% growth climbed to nearly 6% from just over 4% during the same period.

Besides, the share of firms reporting a revenue fall eased to 30% in Q4 from 33% in Q1 and 36% in Q2, when weak domestic demand and the US tariff standoff weighed heavily on topline.

The sharpest improvement came in the slow-growth category. The share of companies reporting 0-10% revenue growth fell to 23% in Q4 after steadily rising from 24% in Q1 to 27% in Q3, indicating that more companies moved into faster growth brackets by the end of FY26.

The improvement coincided with stronger rural cashflows after a favourable monsoon, easing inflation, the rationalization of goods and services tax (GST) slabs, and festive-led discretionary spending, which together supported consumption in the second half of FY26. A lower base through FY25 also aided growth.

The recovery, however, remained concentrated in a narrow set of sectors,

A deeper analysis of Q3 and Q4 showed sustained momentum in capital-market intermediaries, wealth managers, AI and cloud infrastructure providers, specialized pharma manufacturers, luxury jewellery retailers, and electrical equipment makers linked to grid

Experts said these sectors remained weighed down by weak global demand, Chinese dumping pressures, sluggish factory expansion and cautious lower-income consumption. The divergence suggests India Inc.'s H2FY26 recovery was driven by premium consumption,

pricing often sits in businesses the broader market is choosing to ignore. "Sustaining Q4's momentum in June quarter could be challenging as tailwinds fade," said Anil Rego, founder and fund manager at Right Horizons PMS. "Q1 (FY27) could see moderation after Q4's sharp acceleration, with consumption leadership remaining narrow and premium-focused."

Rego warned that the narrow earnings leadership raises valuation risks, leaving markets vulnerable to even minor slowdowns in growth or profitability within leadership sectors.

The broader operating environment is also turning more challenging. During FY25 and early FY26, many companies protected earnings through cost rationalization, softer commodity prices and selective pricing despite weak demand. But rising crude oil prices amid the West Asia conflict are now increasing logistics, packaging, fuel and raw material costs across sectors.

Industry executives said higher prices of milk, wheat and edible oils are also squeezing margins, pushing FMCG companies to raise prices and reduce pack sizes in ways that could slow the recovery in consumer demand, as Mint reported earlier.

That raises the risk of a tougher FY27, analysts said, as companies could lose the cushion of benign input costs just as higher fuel prices and borrowing costs begin weighing on demand.

At this juncture, pricing power is critical, said Equite Capital's Bharadwaj. "B2B firms with genuine technical or engineering advantages can typically pass on higher input costs and protect margins," he said. "But commoditised businesses selling undifferentiated products have less room to do so, raising the risk of a double squeeze from weaker topline growth and margin pressure simultaneously."
